Case study title

Your name

Project overview

The product:

Insert a few sentences about the app, website, or other product that you designed and the target users

Project duration:

Insert the time that you worked on this design project - e.g., Month Year to Month Year

Preview of selected polished designs.

Google

Project overview

The problem:

Insert one to two sentences about the problem(s) you were trying to solve.

The goal:

Insert one to two sentences about the goal of the project.

Project overview

My role:

Identify your role in the project - e.g., lead UX designer, UX researcher, etc.

Responsibilities:

List the responsibilities you had throughout the project - e.g., user research, wireframing, prototyping, etc.

Understanding the user

- User research
- Personas
- Problem statements
- User journey maps

User research: summary

Write a short paragraph describing your user research.

This can include the type of research you conducted, assumptions that you made going into the research, and how your assumptions changed after conducting research.

User research: pain points

1

Pain point

Write one to two sentences reflecting on the pain point listed above and how it will guide designs moving forward.

2

Pain point

Write one to two sentences reflecting on the pain point listed above and how it will guide designs moving forward.

3

Pain point

Write one to two sentences reflecting on the pain point listed above and how it will guide designs moving forward.

4

Pain point

Write one to two sentences reflecting on the pain point listed above and how it will guide designs moving forward.

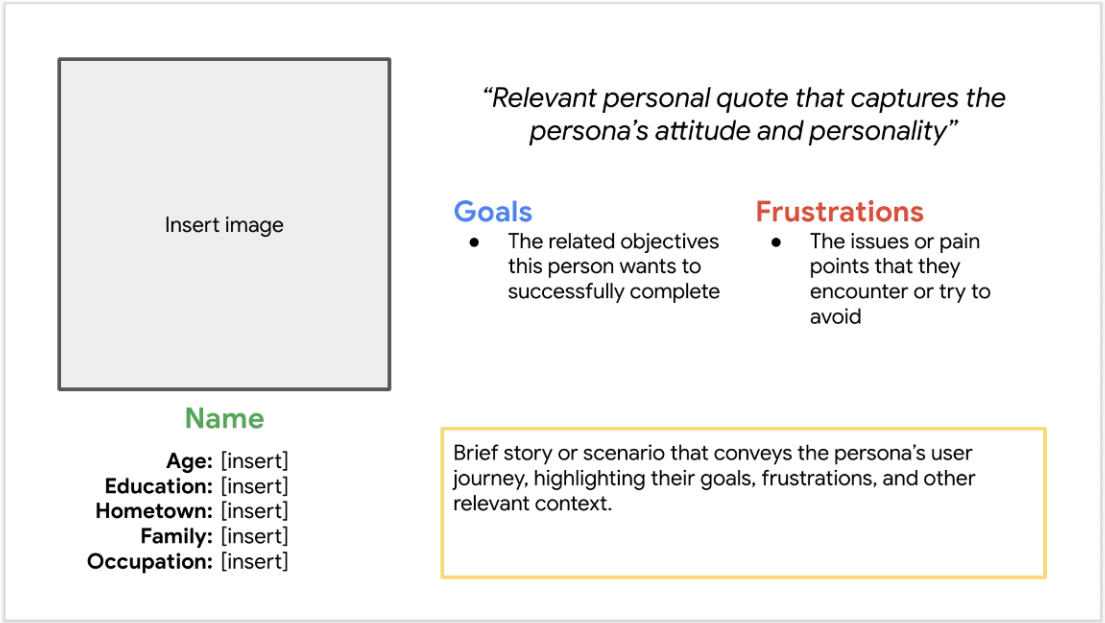

Persona: **Name**

Problem statement:

[User name] is a [user characteristics]

who needs [user need]

because [insight].

User journey map

[Your notes about goals and thought process]

Image of user journey map

Starting the design

- Paper wireframes
- Digital wireframes
- Low-fidelity prototype
- Usability studies

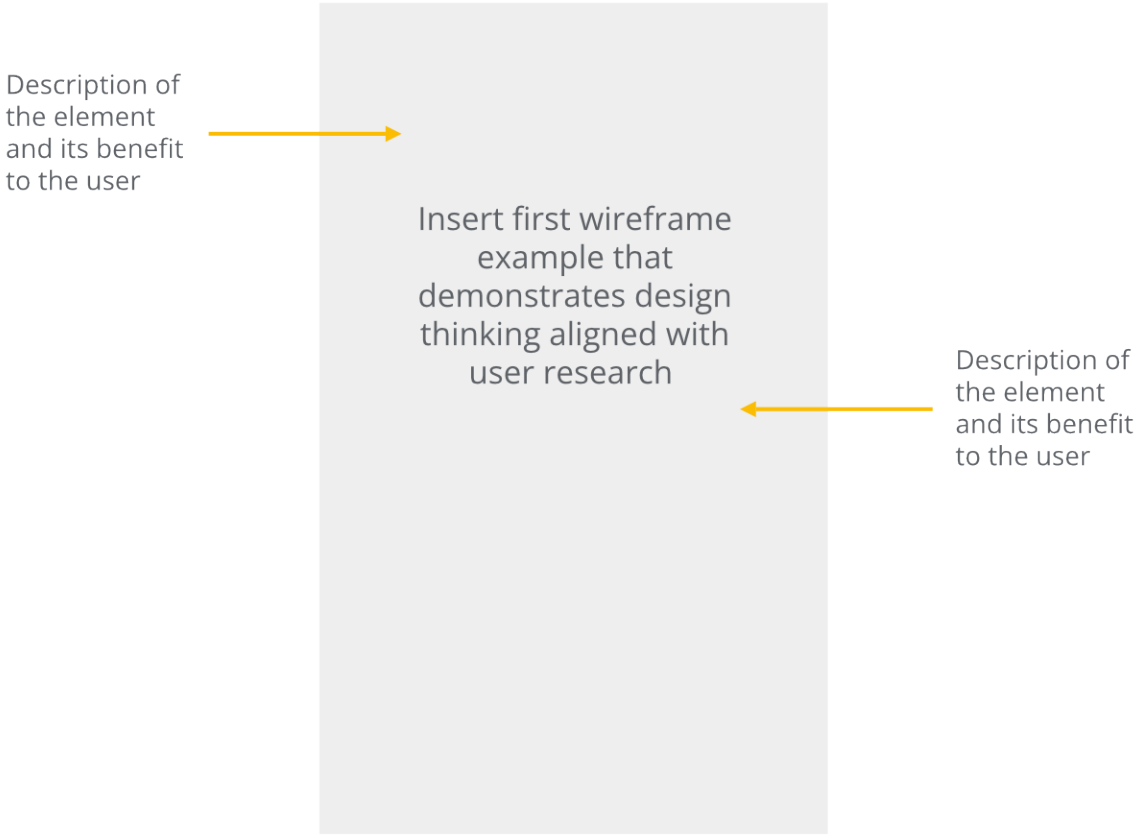

Paper wireframes

[Your notes about goals and thought process]

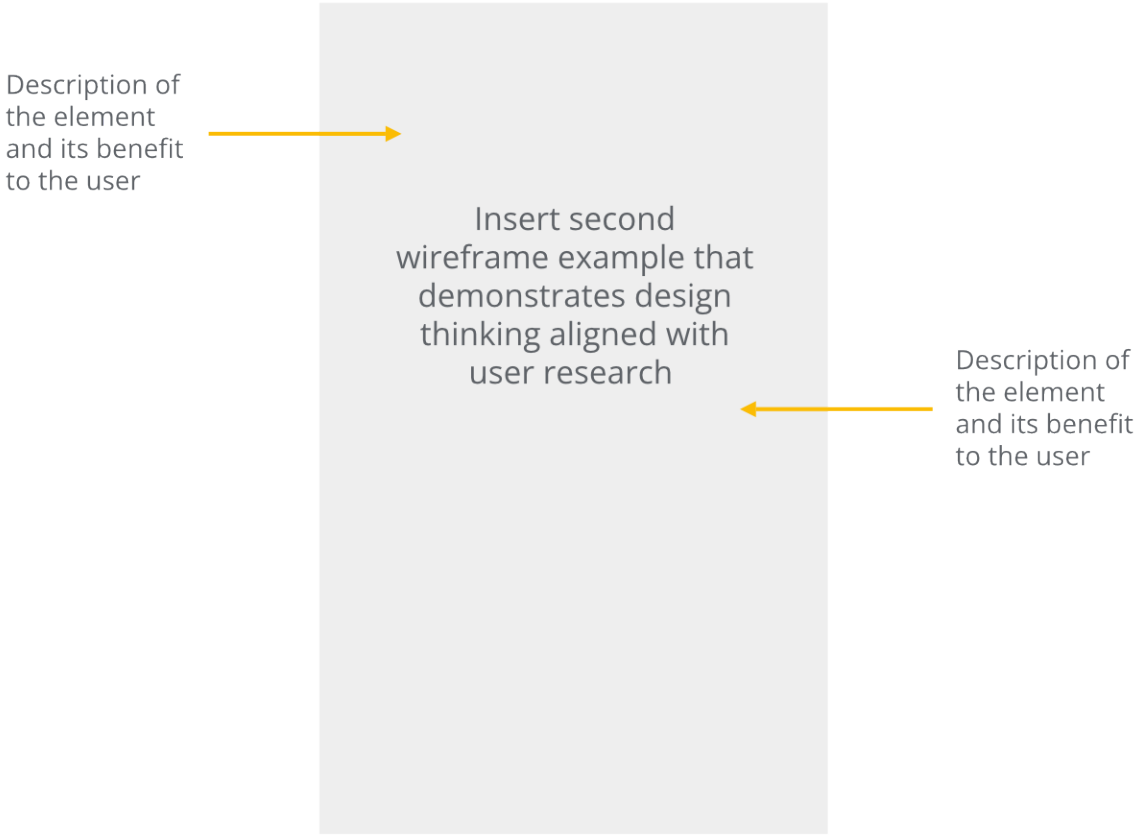

Digital wireframes

[Your notes about goals and thought process]

Digital wireframes

Low-fidelity prototype

[Link to low-fidelity prototype and brief description of the user flow]

Screenshot of prototype with connections or prototype GIF

Usability study: findings

Write a short introduction to the usability studies you conducted and your findings.

Round 1 findings

1. Insert finding
2. Insert finding
3. Insert finding

Round 2 findings

1. Insert finding
2. Insert finding
3. Insert finding

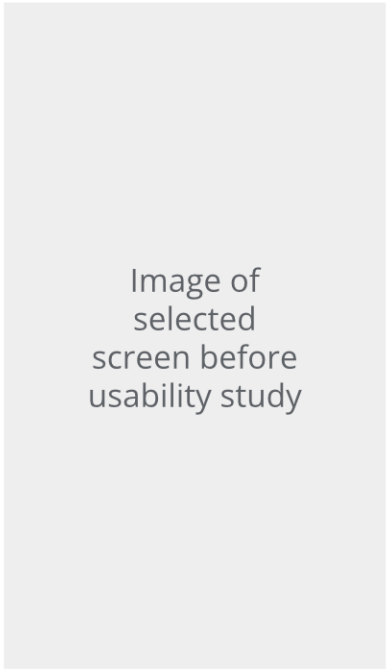

Refining the design

- Mockups
- High-fidelity prototype
- Accessibility

Mockups

[Your notes about goals and thought process]

Before usability study

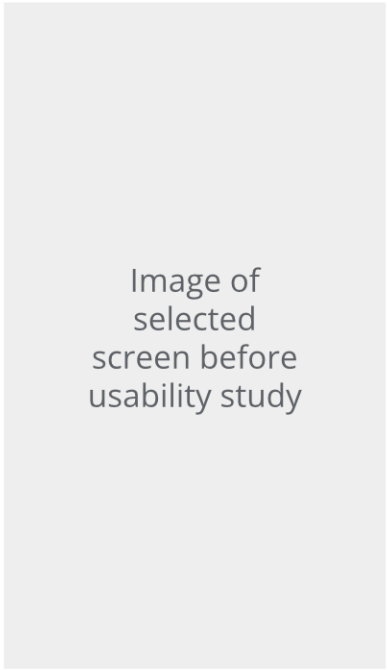

After usability study

Accessibility considerations

1

Insert one to two sentence summaries describing each accessibility consideration applied in your designs.

2

Insert one to two sentence summaries describing each accessibility consideration applied in your designs.

3

Insert one to two sentence summaries describing each accessibility consideration applied in your designs.

Going forward

- Takeaways
- Next steps

Takeaways

Impact:

Insert one to two sentences summarizing the impact of your designs. In the real world, you'd include data like number of downloads or sign ups, but since this is a course project, you can include a positive quote from a peer or study participant.

What I learned:

Insert a few sentences summarizing what you learned throughout the project.

Next steps

1

Insert a few sentences summarizing the next steps you would take with this project and why.

2

Insert a few sentences summarizing the next steps you would take with this project and why.

3

Insert a few sentences summarizing the next steps you would take with this project and why.

Let’s connect!

Insert a brief sentence or two about contacting you and/or reviewing more of your work.

Provide your contact information here. This might include your email address, phone number, and website or link to other professional platforms.

Thank you!
